Contributions:

Deployment:

Steps to main.py program from terminal (in the README.md on GitHub):

1. Make sure the `.activePlaylists` directory is deleted in the backend folder
2. In the terminal type: `python3 main.py`
3. Enter your Spotify username when prompted
4. `cd` into `.activePlaylists/../../` until you reach the `index.txt` file
5. Open file to view changes made

To run the CLI:

1. Type `python3 cli.py <command>`
